

## RESEARCH AND DEVELOPMENT

### CURRENT & PAST PROJECTS

The formulation of several hundred nutritional supplements for several companies, one of which is Slow Mag capsules; a magnesium supplement for Merck SA (Pty) Ltd, the market leader in South Africa, dominating with approximately 80% market share.

The development of Grapecydin, a high-quality grape seed extract with a patented extraction process. This unique grape seed extract has a high anti oxidant activity and is extracted using no organic solvents.

The development and formulation of BioxidIn, an antioxidant formulation containing Grapecydin, for Merck SA (Pty) Ltd.

The development of an immune-supportive supplement in the field of HIV, widely patented including USA, EU and AU by Biomox Pharmaceuticals and tested extensively in clinical trials. Status – Ready for commercializing, currently seeking international marketing partner.

Other potential products in the pipeline (Focusing on African herbs):

- A herbal aphrodisiac developed by one of the leading universities.
- A herbal extract for fever blisters
